SKILLS

Languages

- JavaScript, Python, Java, C, SQL

Frontend

- React, React Native, Flutter

Backend

- Node.js, Express.js, Django

Database

- MongoDB, MySQL, SQLite

Tools

- Git, GitHub

LANGUAGES

- Tamil
- English

PROFILE

Full Stack Developer and ML Engineer with hands-on experience building end-to-end systems, from responsive frontend interfaces to AI-powered backend solutions. Skilled in developing scalable web applications, integrating machine learning models, and designing clean, efficient architectures.

WORK EXPERIENCE

Infosys

2026 - PRESENT

Full Stack Developer Intern

- Contributed to development of full-stack applications using React and Express
- Worked on API integration and database management
- Improved application performance and resolved bugs

PROJECTS

AquaSense

Real-time IoT water quality monitoring system

- Built a real-time water monitoring system with sensor data integration
- Implemented ML-based anomaly detection for water quality analysis
- Enabled real-time alerts and notifications for critical conditions

→ <https://github.com/Tharanitharan30/aquasense>

TaxPal

Personal finance and tax management web app

- Developed a full-stack application for tax calculation and expense tracking
- Implemented categorized expense tracking with report generation
- Designed intuitive UI for seamless financial management

→ <https://github.com/Tharanitharan30/Taxpal>

ACHIEVEMENTS

Participated in multiple hackathons including VIHANSA, Hack4impact, Theerv'ATHON and Vidyut'25

EDUCATION

BE.Computer Science and Engineering

2024 - 2028

Karpagam Academy of Higher Education
